

## MICROFIX SERVICES

Microfix Services is our heating, ventilating and air conditioning division. It provides services in relation to:-

- Commercial office HVAC (Heating, ventilation and Air Conditioning)
- On-going maintenance and repairs
- Data centre & computer room cooling
- Fresh air supplies
- Specialist installations

## Air Conditioning Systems

Microfix Services objectives are to provide you with air conditioning systems that work effectively and efficiently, whatever the site.

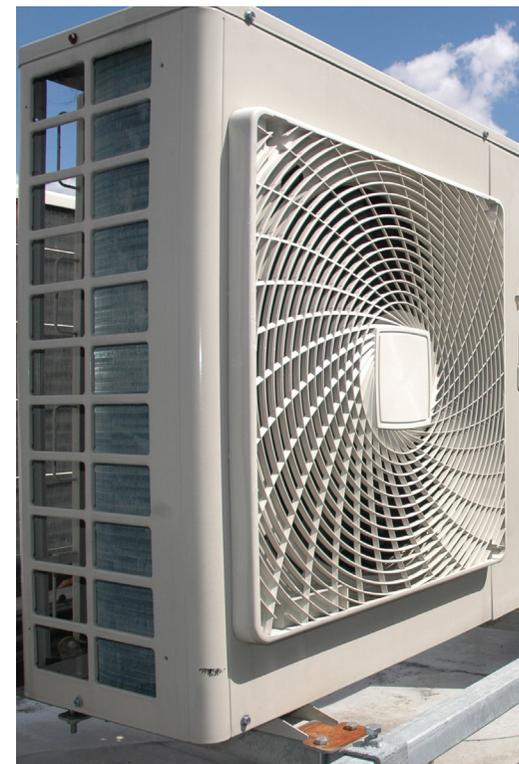

We can design and install air conditioning systems that can provide cooling in a variety of commercial environments including data centres, offices, education, medical and retail.

### Key features: -

- Specialised air conditioning services such as data centre and server room cooling – as a specialist air conditioning contractor, we have expert knowledge in the application of air conditioning in the data centre environment.
- R22 replacement services – Microfix HVAC services can help you ensure you are meeting your obligations with regard to R22 refrigerant replacement. Although many companies have undergone the process of exchanging their R22 refrigerants, huge conversions still need to be undertaken to ensure that the 2015 deadline for complete **R22 replacement** is accomplished.
- Comprehensive air conditioning maintenance packages – each of our air conditioning installations comes with the option of on-going maintenance and servicing packages to ensure efficient and effective running in the future

### Key benefits: -

- Increased staff productivity - through increased comfort levels in the working environment.
- More effective operation of your IT systems - for example operating hot and cold aisle in your data centre.
- Reduced utility bills through less energy consumption.

## Commercial Heating Services

Microfix Services is an independent specialist in the provision of industrial and commercial heating systems. We offer the following services as part of a package: -

- consultation
- design
- supply
- installation
- Commissioning
- maintenance

We have a wealth of experience of providing practical and energy efficient commercial heating solutions. From warehouse heating, factory heating, office heating and production areas of all kinds.

We can also provide

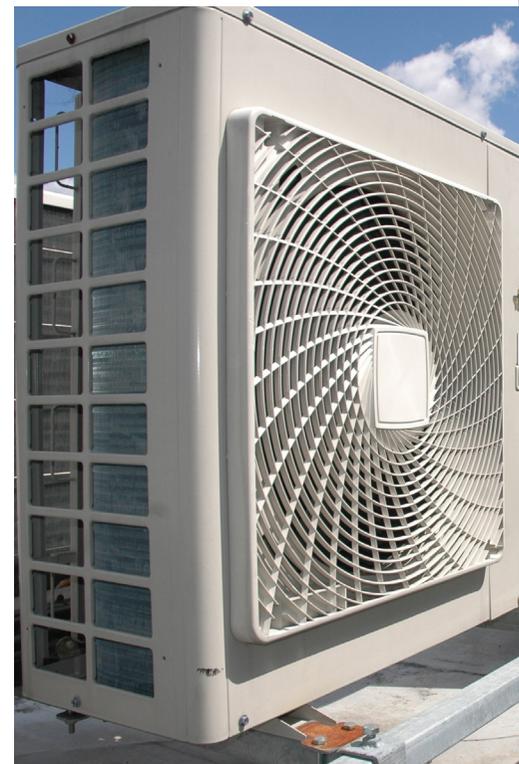

- complete site de-centralisation systems
- warm air heating systems
- plaque or radiant heating type systems (gas, oil, electric, hot water or steam)

All systems designed with energy efficiency in mind and we ensure all installations are carried out within the government ECA scheme (see [www.eca.gov.uk](http://www.eca.gov.uk))

### Maintenance and support

We offer a dedicated after sales support service. We make sure you receive the highest level of maintenance and emergency support. Having pre-planned maintenance in place ensures that your systems run at optimum efficiency and avoid costly and inconvenient breakdowns.

**FREE SURVEY** - Contact us now for a free professional survey of your environmental needs after which we will provide you with a technical report identifying the solution that is right for you and your business

## Ventilation Services

As a business, you need to look after the health and welfare of your staff as well as adhering to health and safety standards. It is common place for working environments to become very hot and stuffy. Frustrated and fractious staff has a direct negative impact on productivity.

A ventilation system installed by Microfix will help to remove heat and humidity from the air and also provide a method to remove fumes and noxious smells, providing a supply of clean, fresh air.

Microfix Services offers a full service for Ventilation Services: -

- consultation
- design
- Installation
- maintenance

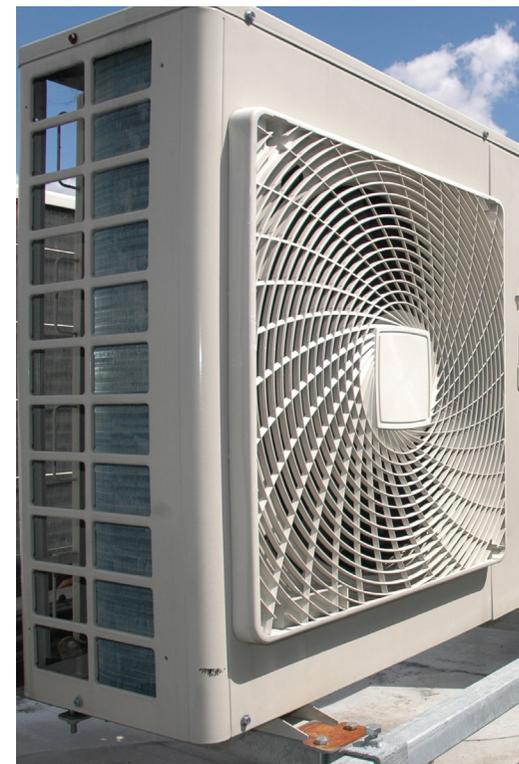

Heat recovery ventilation systems not only extract the stale indoor air and replace it with fresh air, but also by passing the supply air close to the exhaust air it is possible to warm the incoming air. This means that during the cold winter days, heat is not lost from the building through your commercial ventilation system. By combining this type of commercial ventilation with an air conditioning system, one can control the other. Because Microfix Services is a specialist in both we can design the system to maximise this.

### Maintenance and support

We offer a dedicated after sales support service. We make sure you receive the highest level of maintenance and emergency support. Having pre-planned maintenance in place ensures that your systems run at optimum efficiency and avoid costly and inconvenient breakdowns. Please go to our **servicing and maintenance** page for more information.

## Serviceing and Maintenance

Microfix Services can offer comprehensive servicing and maintenance packages for all types of air conditioning systems.

The installation of your air conditioning system is a major investment. Naturally you will want to protect your investment by both prolonging the life of your system and ensuring that the air conditioning units are running efficiently and economically.

You can do this by implementing an air conditioning maintenance package from Microfix HVAC Services.

### Key features: -

- Air conditioning servicing packages - we can arrange to have one of our expert engineers with you, within an agreed time, to identify and repair the fault. Our highly qualified engineers are experienced in fault diagnosis and the repair of all major brands of air conditioning equipment including Daikin™, Mitsubishi™ and Fujitsu™.

- Planned preventative maintenance programme - regular maintenance is vital if you wish to prolong the working life of your cooling system and to keep it performing at optimum efficiency.

### Key Benefits: -

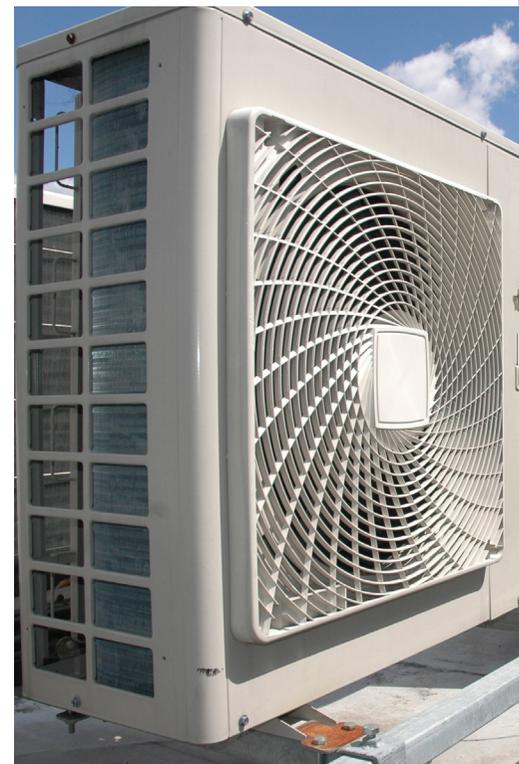

- Ensuring the long running life of your air conditioning systems and ensuring a better ROI.
- Greatly reduced need for expensive repairs or installations on systems.

**Contact us** now for a no-obligation chat about your air conditioning servicing and maintenance requirements.
